

Corneal Layer Findings and Conditions Cheat Sheet

Listed below are various corneal findings and conditions organized by the layer(s) in which they present.

Epithelium	Stroma	Descemet's
Punctate Epithelial Erosions Recurrent Corneal Erosions Hudson-Stahli Line Fleischer's Ring Stocker's Line EBMD/ABMD/Map-Dot-Fingerprint Dystrophy/Cogan's Dystrophy Meesmann Corneal Dystrophy Juvenile Epithelial Dystrophy Thygeson's Superficial Punctate Keratitis Herpetic dendrites Whorl Keratopathy	Band Keratopathy (anterior stroma) Macular Corneal Dystrophy Arcus senilis/Circumsenilis Crocodile Shagreen Reis-Bucklers Corneal Dystrophy (anterior stroma) Thiel-Behnke Corneal Dystrophy (anterior stroma) Lattice Corneal Dystrophy Granular Corneal Dystrophy Schnyder Crystalline Dystrophy Corneal hydrops (subsequent edema) Peripheral Ulcerative Keratitis Spheroidal Degeneration Pellucid Marginal Degeneration Interstitial Keratitis Terrien's Marginal Degeneration Cornea Farinata Wessely Ring Central Cloudy Dystrophy of Francois Fleck Dystrophy Posterior Amorphous Corneal Dystrophy Congenital Hereditary Stromal Dystrophy	Posterior Embryotoxon Arcus Senilis/Circumsenilis (origination) Haab's striae Hassall-Henle bodies Corneal hydrops (origination) Posterior Polymorphous Corneal Dystrophy Kayser-Fleischer Ring
Bowman's		Endothelium
Band Keratopathy Salzmann Nodular Degeneration (technically between epithelium and bowman's) Reis-Bucklers Corneal Dystrophy Thiel-Behnke Corneal Dystrophy Keratoconus (origination)		Fuch's Corneal Dystrophy Congenital Hereditary Endothelial Dystrophy Arlt's triangle Posterior Polymorphous Corneal Dystrophy Disciform Keratitis (primary) Guttata
